Have you ever wanted to command your own starship? The William Staerkel Planetarium will enter the world of gaming on October 12 as we play the Artemis Bridge Simulator in the dome. The program networks several computers together simulating duty stations aboard a starship, including Captain, Science, Helm, Communications, Engineering and Weapons Control. Players must work together to defeat the game. Cooperation is encouraged! Sound and lighting effects add to the experience! You can see a tutorial of the game here: https://www.youtube.com/watch?v=geZUduFE4vY

Advance registration is required! You may register individually or register a team of six people. The game will be played in 90 minute intervals starting at 9am. Anyone age 10 or over may play. Staffers will be on-site to give a tutorial of the software before the simulation is played. No prior experience is necessary. Games start at 9am, 10:30am, noon, 1:30pm, and 3pm.

Cost: $6 per person or $30 for a full team of six people. You may also come and watch for $2. No pre-registration is required for non-participants. Make checks payable to Parkland College.

To register, you may call the planetarium office at 217.351.2568 or visit with this form (M-F, 8-5pm)

Name(s)  Phone No.  Email  Duty station
